Mr. Paul Vette
Founder & CEO
vTech Innovative Solutions, LLC
3135 NW 79th Avenue Road
Ocala, FL 34482

Mr. Vette,

Many thanks for bringing your innovative dewatering technology to our attention. The demonstration was very impressive and informative. We believe that the savings to be realized in energy, processed water, upfront costs, maintenance costs, operational costs and time makes it very attractive for the City and will go directly to our bottom line.

Along with the smaller footprint of the process units, the technology should result in lower maintenance and operational costs when compared to traditional and other conventional dewatering methods. We are also keen to explore the full range of possibilities of the technology in municipal water and wastewater treatment, such as, lime sludge dehydration to cake, wastewater sludge dehydration to cake and even future applications if the City incorporates membrane filtration into its water treatment process.

We would appreciate if you could come to our offices and make a presentation to our team. Please propose suitable time/dates for consideration.

With kind regards,

Riley Smith
Utilities Director
